

Statement of Purpose

I am Md Kawsar Miah a Bangladeshi student expressing my utmost interest in studying in International Foundation Year in Business(2.5 terms) at Nottingham Trent International College. I completed a secondary school certificate with a science background and obtained a GPA of 4.06 out of 5.00 in 2020. After that, I earned a Higher Secondary School Certificate with a Humanities background and obtained a GPA of 4.00 out of 5.00 in 2022. After that, I was preparing for the admission tests in Public Universities in Bangladesh but unfortunately for almost 1 and a half years, I could not get my desired course. After that, I researched universities abroad and found the UK suitable for my desires. For this reason, I took the IELTS examination on 3rd August 2024.

The decision to choose International Foundation Year in Business is based upon some significant factors. The course modules in Foundation Year include Accounting and Finance for Managers, Business Development and Entrepreneurship, Economics, English for Academic Purposes, Marketing in the Operational Context, etc. These modules will build a strong foundation of knowledge about business studies for me. I am willing to study BA (Hons) in Business as a progression degree highly relevant course covers a wide range of management functions, procedures, and techniques related to running a firm. It was developed in collaboration with enterprises and reflects the evolving corporate environment. If you want to shape your professional goals and leave your alternatives open while you're in school, this is the best option. Also, the amazing fact is that the course is accredited by the Chartered Management Institute (CMI).

I have chosen Nottingham Trent International College for my International Foundation Year as I will get to study the progression year at Nottingham Trent University. Nottingham Business School has triple accreditation from the highest worldwide business school accreditation bodies, AACSB, AMBA, and EQUIS. The Newton building, located in the heart of our bustling City Campus, will be my primary study space. Our facilities include a variety of lecture halls and classrooms, as well as specialized market research reporting platforms, internet tools, and the Business Lab, a trading floor furnished with Bloomberg computers that allows you to actually explore international markets. NTU is ranked 1st in the UK for employability according to Uni

Compare 2025. The university is also rated Gold by the Teaching Excellence Framework which definitely ensures the top-notch teaching quality of the university.

I chose to pursue my undergraduate studies in the United Kingdom after carefully evaluating several factors. The UK education system is well-known throughout the world for its high-quality teaching, course curriculum, and certificate values. I chose the UK to finish my pathway program because of its great advancement in further education and career enrollment. The UK institutions are well-known for their business programs and innovative business practices. I believe that the United Kingdom is the best place for me to pursue a career in this field. Furthermore, tuition and living expenses are affordable in the United Kingdom.

After finishing my undergraduate studies, I plan to return to my home country. I will try to join as an executive business developer in one of the top industries of my country such as Beximco, Square, RANGS, etc. As a UK degree is highly recognized by the recruiters I am positive that I will get my desired job. I strongly feel that acquiring expertise through specialized courses and staying up-to-date on the latest techniques will boost my confidence.

Sincerely,

Kawsar Miah.
